I am a Frontend Web Developer focused on creating innovative, beautiful and functional web applications. I am skilled in HTML, CSS, JavaScript, React and Python.

Work Experience

Switcheroo

HNGX Internship - Osogbo

September 2023 to Present

- Participated in the HNGX Zuri Internship which is an online internship program where interns for various tracks work on assigned projects to be promoted to new levels on successful completion and grading.
- Built an image gallery called Switcheroo for the Stage 3 of the internship using the React framework that allows users to rearrange images by dragging and dropping with a functional authentication page and meaningful success or error messages.
- Developed a simple and easy to use user interface for users to drag and drop images to rearrange with a search bar for users to filter images displayed based on their tags.
- Pushed project to production using Git, GitHub and Vercel for hosting.
- Submitted project and was promoted to the next stage of the internship.

Elements (Weather App)

Elements - Osogbo

September 2023 to September 2023

- Developed a weather web application called Elements using React.
- Consumed RESTful API from the WeatherAPI endpoint using React's useEffect hooks and made use of HTML5 geolocation API to obtain users' location for accurate display of weather information.
- Designed a wireframe and implemented a beautiful user interface for the application from scratch drawing inspirations from Dribbble and Figma community projects.
- Deployed project to production using Git, GitHub and Vercel for hosting.
- Submitted the web app to fellow developers and mentors and received positive feedbacks for the intuitive UI and functionalities.

Tenzies Game

Tenzies Game - Osogbo

August 2023 to August 2023

- Built a fun and interesting Tenzies board game with React.
- Created an intuitive UI for the game.
- Utilized React's useState and useEffect hooks.
- Used JavaScript's localStorage method to store game data to the browser's local storage.
- Received accolades and positive reviews from mentors and users of the game for its easy to use interface and smooth gameplay.

SmartU (Quiz App)

SmartU - Osogbo

August 2023 to August 2023

- Developed a Quiz web application called SmartU using the React framework.
- Utilized React's useEffect hook to interact with the Trivial API to fetch quiz data.
- Created a functional user interface for users to answer quizzes and view results.
- Developed a feedback state for pointing out users' selected answer and the correct answers if the users were wrong.
- Deployed project to production using Git, GitHub and Vercel for hosting.
- Received positive feedbacks and reviews from test users and mentors and the criticisms were iterated upon in the next versions of the app.

Education

Bachelor of Science in Food Science and Technology

Obafemi Awolowo University - Ile-Ife, Osun State, Nigeria

January 2021 to Present

Skills

- Git
- JavaScript
- GitHub
- HTML5
- CSS
- APIs
- Python
- React

Languages

- English, Yoruba - Fluent
